TECHNICAL SKILLS

Programming Languages: Python, Java, C, HTML, Css, Javascript
Machine Learning: Supervised Learning, Unsupervised Learning, Classification, Regression, Clustering, Feature Engineering, Model Evaluation
Deep Learning: Neural Networks, CNNs, Transfer Learning, Computer Vision, Image Classification
AI/ML Frameworks: TensorFlow, Keras, Scikit-learn, OpenCV, NumPy, Pandas, Matplotlib
Core Computer Science: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

INTERNSHIP EXPERIENCE

Android App Development using Generative AI Intern Feb 2026 – May 2026
MindMatrix
- Developed Android applications using Kotlin, Jetpack Compose, Firebase, and Generative AI tools.
- Built and enhanced the Kavya-Kanaja application using MVVM architecture and cloud integration.

Artificial Intelligence Intern Sep 2025 – Oct 2025
Internz Learn
- Built Machine Learning models using Python, TensorFlow, and Scikit-Learn.
- Performed EDA, feature engineering, predictive modeling, and model evaluation.

Web Development Intern Sep 2025 – Nov 2025
Techsolid Development
- Developed responsive web applications using HTML, CSS, JavaScript, and Git.
- Implemented modern web development practices and deployment workflows.

Cyber Security Intern Sep 2025 – Oct 2025
Pratinik Infotech
- Gained hands-on experience in cybersecurity fundamentals, vulnerability assessment, and threat analysis.
- Explored authentication mechanisms, network security, and risk management.

PROJECTS

Smart Traffic Management System Nov 2024 - Dec 2024
- Developed a computer vision-based traffic monitoring system using YOLOv8, OpenCV, and Python.
- Implemented adaptive signal control and real-time traffic analytics through a Flask dashboard.

AI-Powered Health Chatbot for Rural Healthcare Mar 2025 - Apr 2025
- Developed an AI-powered multilingual health chatbot using NLP and ML to provide symptom analysis, telemedicine referrals, and voice/SMS support for rural populations.
- Applied text preprocessing, feature engineering, and predictive modeling to improve response quality.

Skin Cancer Detection with Federated Learning and Blockchain Jan 2025 - Apr 2025
- Built a skin lesion classification system using HAM10000, ResNet50, TensorFlow, and Keras.
- Integrated Federated Learning, Ethereum, Web3, Smart Contracts, and Flask APIs for privacy-preserving model training and verification.

Kavya-Kanaja: Android Application for Creative Writing Management Feb 2026 - May 2026
- Developed an Android application using Kotlin, Jetpack Compose, and MVVM architecture for literary content management.
- Integrated Firebase services for authentication, cloud synchronization, search, and offline access.

EDUCATION

10th Grade Apr 2019 – Apr 2020
Sri Krishna International School, CISE, Bangalore
Score: 92.5%

12th / Pre-University Course (PUC)

P.E.S College, Bangalore

Score: 95.4%

May 2020 – May 2022

B.E. in Computer Science and Engineering

JSS Academy of Technical Education, Bangalore

CGPA: 8.78

Aug 2022 – 2026
